

# 4Life® Transfer Factor™ ReCall®

## TARGETED ACUITY

“Hi! How are you? It’s so good to see you, too.” (Now, if I can only remember your name . . . you were a friend in school . . . or maybe we worked together at that place . . . what is your name?) “Where are you living now?” (Play for time . . . why isn’t my husband helping me out here . . . didn’t he get the signal? Maybe I’ll remember . . . oh great . . . she remembers my name.)

At times like this mental acuity sounds pretty good! Not only does our memory enable us to recount names, dates or past events in our lives, it is also often associated with intelligence and increased effectiveness.

Transfer Factor ReCall is formulated to give your brain the support it needs. It includes patented Targeted Transfer Factor for superior immune system support—specifically targeting the brain—as well as other ingredients known to affect the pathways associated with mental acuity and overall brain health.

## Key Points

- **Supports Targeted System Health:** By targeting the superior immune-enhancing benefits of transfer factors, Transfer Factor ReCall provides unprecedented immune knowledge for support of overall brain health. This complete formula promotes healthy immune and oxygen functions, supporting the brain’s ability to operate at a more efficient mode and direct energy toward the most critical need. So, rather than expending energy to defend itself, the brain can focus on optimal function.
- **Promotes Optimal Cognitive Function:** Transfer Factor ReCall combines some of the most potent ingredients known to support healthy cognitive function in people of all ages. Among many other significant health benefits, the biological actions of vinpocetine show that it promotes circulation and oxygen utilization in the brain and healthy blood flow.

Phosphatidylserine (PS) is a naturally occurring phospholipid or “good fat” that is essential to the functioning of all cells in the body. Brain tissues are especially rich in PS, which functions as a brain cell regulator with regard to neurotransmission and synaptic communication, both key elements in maintaining memory and cognitive function.

Glycerophosphocholine and Huperzia serrata (Huperzine A) have been shown to enhance alertness, mental agility and recall. Huperzine A works by inhibiting the enzyme that breaks down acetylcholine, an important brain chemical for learning and memory. Bacopa monnieri supports healthy neurons in the brain for normal memory and cognitive function.

## Technical Points

- Magnesium from oxide is included to support maximum nutrient absorption.
- Transfer Factor ReCall is the second Targeted Transfer Factor product from 4Life® and is backed by an exclusive patent (US Patent 6,468,534) for obtaining specialized transfer factors from egg yolks.

**DIRECTIONS:** Take three (3) capsules daily with 8 oz of fluid.

**Serving Size:** Three (3) capsules  
**Servings Per Container:** 30

## Supplement Facts

Amount Per Serving		%DV*
Magnesium (as magnesium oxide)	168 mg	42%
<b>Targeted Transfer Factor</b>	<b>100 mg</b>	<b>**</b>
<small>A proprietary extract containing Targeted Transfer Factor from eggs</small>		
<b>Proprietary Blend</b>	<b>672 mg</b>	<b>**</b>
Vinpocetine		
Huperzia serrata extract (Huperzine A)		
Soy Lecithin (30% phosphatidylserine)		
Glycerophosphocholine		
N-Acetyl Tyrosine		
N-Acetyl Cysteine		
Bacopa monnieri Extract		
Lemon Balm Extract		
Ginkgo biloba Extract (24% ginkgo flavone glycosides, 6% terpene lactones)		

\*Reference Daily Intake (RDI)

\*\*Daily Value (DV) not established.
